

Amending the Natural Vegetative Buffer

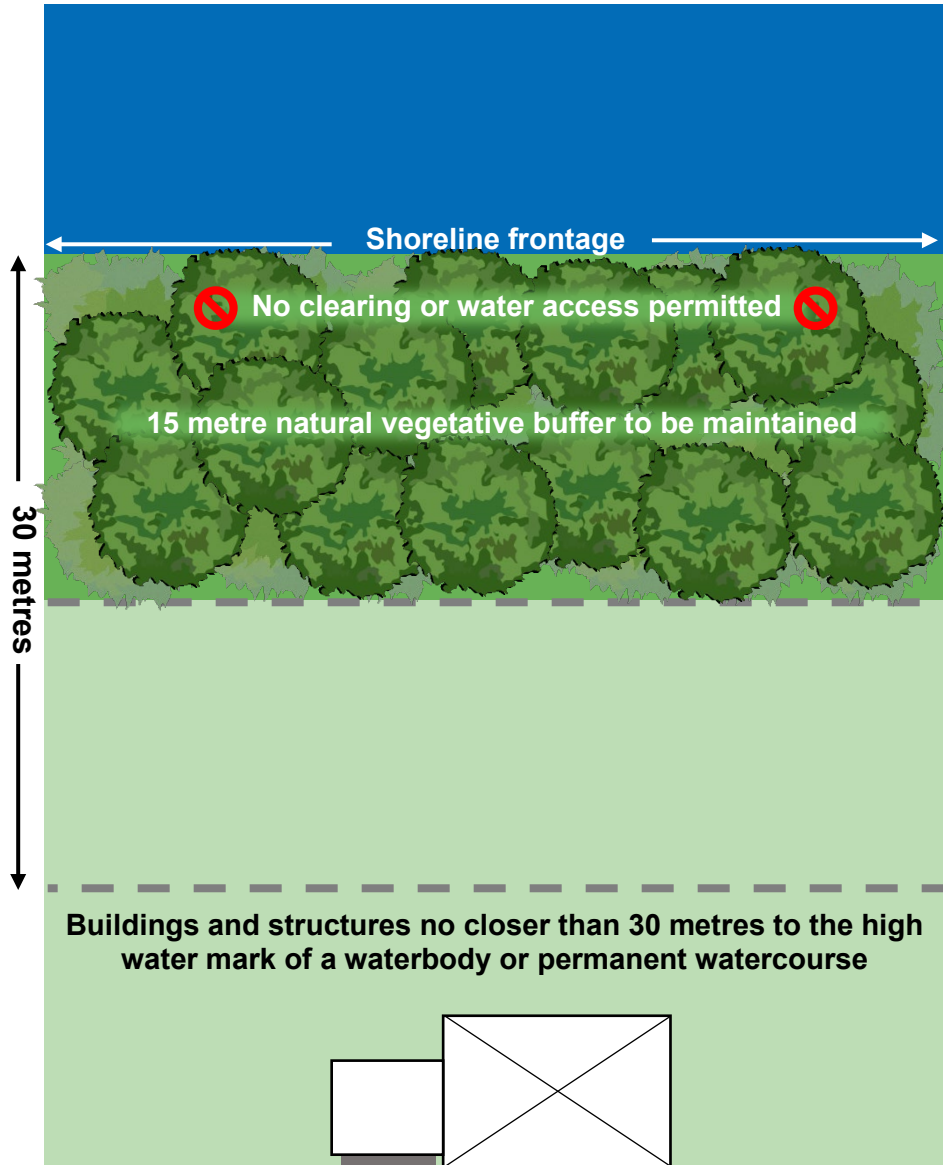

Hastings Highlands

Beautiful By Nature

Natural vegetation along the shoreline of our lakes, ponds, rivers, and streams play a crucial role in protecting water quality, preventing toxic blue-green algae blooms, preventing soil erosion, and preserving the ecological balance of aquatic environments.

The Municipality of Hastings Highlands is amending the Comprehensive Zoning Bylaw with Bylaw 2022-005 to conform with the County of Hastings Official Plan. Bylaw 2022-005 will amend the requirements for natural vegetative buffers along shorelines.

Current Buffer Requirements (since 2004)

Proposed Buffer Requirements (in Bylaw 2022-005)
